

Strad Oilfield Services

Communications

Immediate, Reliable & Safe Contact On-Site...

Strad's Communications team offers customers a full range of wireless solutions to address remote communication needs throughout North America. Strad provides unmatched service and the latest technology and equipment that is simple to use and understand.

Our customized packages support clear, efficient and safe communication. Strad's customers avoid unnecessary runaround so they can focus on improved job performance and safety. Strad works to meet each customer's needs on performance and price, while never compromising on quality.

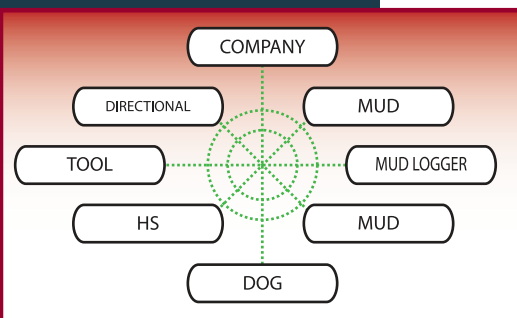

Once the initial install is complete, our auto acquire solution is as easy as pushing a button to setup and takedown mobile communications. This leading edge wireless solution makes ongoing, on-site service and moves as efficient and safe as possible.
