Drilling Services Division

Strad's Drilling Services Division offers a wide range of drilling-related products and services through North America.

Surface Rental Solutions

Our rentals group offers a comprehensive range of drilling-related surface equipment. We exceed customer expectations by providing quality products, first rate service and developing custom solutions for any job through Western Canada and the USA.

Environmental & Access Matting Solutions

Our matting team offers a fleet of innovative matting products and provides a fully-integrated matting solution. We are setup to handle the coordination of all project logistics and meet any project need.

Manufacturing

Our manufacturing group is a global leader in the production of matting and steel oilfield equipment. Strad uses lean manufacturing principles and is capable of large-scale production and rapid turnaround times.

Drill Pipe, Tubing & Tools

Our downhole team offers a comprehensive range of modern subsurface rental equipment including drill pipe, tubing and a complete line of handling tools.

Transport

Our transport group provides widespread trucking services to the industry. Our team has extensive trucking and oilfield hauling experience and works to ensure our customers' products arrive safely and on time.

Production Services Division

Strad's Production Services Division provides customers with the best service team and a premium suite of products that will efficiently bring reserves to market.

Mechanical Services

Our service team is skilled and knows how to repair and service an extensive list of production equipment in the shop or onsite. We are ready to find the solution that best suits our customers' needs.

Electrical & Instrumentation

Our electrical and instrumentation (E&I) team is a certified provider of instrumentation and electrical service needs. We can design, install, maintain and service a wide range of control systems for the energy industry.

We also offer complete estimating, project management, purchasing and qualified field technicians to manage and complete all sizes of construction projects from start to finish.

Packaging Solutions

Our production services team specializes in providing turnkey production equipment packages including: pumps, compression systems, power systems, and process equipment. We are setup to manage the design, procurement or manufacturing of complete packages as well as full support and service for equipment in the field.

Our structures group provides metal building fabrication for a multitude of applications as well as manufactures wholesale polyurethane panels.
