- 15" tires / 5' x 12' skidded unit
- 700 CCA battery
- Block heater
- Internal storage for light fixtures
- 6 x 1000 watt metal halide light fixtures
- Roda deaco air shut down
- Refueling static reel
- 110% full containment for all fluids within the genset
- Ground rod
- 20 lb fire extinguisher
- 2 rear outriggers
- Light mast reaches a height of 30'

Upright Light Stand Features

- 4 Leg style mount is on a 5' x 5' base
- Light top mounted onto the mast
- 3 x 500 watt quartz light fixtures
- 120 volt, 20 amp, 150' power cord
- Crank the winch until the unit is fully upright at a height of 20'
- Light stands are more commonly used inside tank farms

Upright Light Stand Features

- Stackable feature
- 10' long x 3' wide
- Light top mounted onto the mast
- 3 x 500 watt quartz light fixtures
- 150' power cord
- Crank the first winch to stand the unit up
- Crank the second winch to raise the unit reaches a height of 20'
- There is a power switch with a poured seal mounted on the skid
- There are fork pockets and shackles for movement of the skid
- The unit can be stacked and locked together for ease of transportation

Light Tower Advantages

Strad's light towers offer longer service intervals when using synthetic oil in all gensets.

All light towers come with a containment tray that offers 110% full containment for all fluids used in the unit.

Strad's highly trained and qualified Service Technicians provide regular, full onsite maintenance. We deliver timely and efficient solutions from our key branches in Canada and the USA to all service areas.
